## Latest Generation Dermatological Shampoo with Moisturizing Effect and Calming Action

### Key Constituents:

|                        |     |
|------------------------|-----|
| Hydrolyzed Oat Protein | 2 % |
| Glycolic Acid          | 1 % |
| Ceramides              |     |

### Recommended Use:

- Skin that can benefit from the calming properties of oat.
- As a help in processes related to pruritus, allergies and skin irritation.
- Conditions that require restoration and maintenance of the skin's barrier function.
- To keep skin hydration.
- **Regular use on sensitive skin** that require gentle and delicate maintenance.
- For localized areas or generalized use.
- Irritated, dry or scaled skin because of its moisturizing effect.
- Suitable for regular use, as maintenance.

### How to Use:

It can be used daily. The frequency must be determined in each specific case.

- Wet the coat thoroughly with warm water.
- Apply CUTANIA® GlycOat Shampoo and massage deeply hair and skin.
- Leave for 5-10 minutes and rinse off with plenty of warm water.
- Dry the animal with a towel or hair dryer.

#### Initial:

- Local use: once a day.
- Full bath: 2 or 3 applications/week until the process is controlled.

**Maintenance:** once per week or depending on the case. In some cases it can be advisable to trim the hair before the bath to favour the contact between the product and the skin.

Leave for  
5 minutes
