

Maintain skin integrity with the oral and topical ranges.

Atopivet®

ORAL

TOPICAL

Nucleotides **NUCLEOFORCE** (300mg) EPA (400.4mg) Vitamin E (18mg)
 Hyaluronic Acid **Dermial**® vet (10mg) DHA (57.2mg)

Sphingolipids **Biosfeen**® Sphingolipids Hyaluronic Acid
Biosfeen® **Dermial**® vet

- Provides essential nutrients for the proper development of the immune system
- Promotes fibroblast migration
- Promotes fibroblast proliferation
- High EPA and DHA content

- Increases ceramide levels, promotes filaggrin expression and endogenous lipid synthesis, essential for the stratum corneum
- Improves skin hydration and nutrition, helping to maintain skin integrity (improves CADESI and PVAS scores)

Maintains the integrity of the skin externally and internally, all year round

Atopivet® should be applied topically **throughout the year.**

Depending on the progress of the case, it is possible to combine different formats of Atopivet®, as well as changing the frequency of use.

<p>COLLAR Comfort and compliance</p>  <p>Up to 2 months</p>
<p>MOUSSE Large areas and/or areas with less hair. Recommended especially after bathing</p>  <p>2 applications per week</p>
<p>SPOT-ON LOTION Targeted areas, or areas that are difficult to access</p>  <p>2 pipettes per week</p>

Depending on the type of pet owner, in order to facilitate compliance, we recommend:

Collar	Any type of owner
Mousse	Pragmatic
Spot-on lotion	Committed
Capsule	Committed
Oral Solution	Pragmatic

Oral Atopivet® should be given in conjunction with topical Atopivet®, For at least **2 months, twice a year**, preferably during a period of acute outbreaks.

Depending on the progress of the case, it is possible to combine different formats of Atopivet®, as well as changing the frequency of use.
