

 OTIC LINE

# Otiflex

—  
*Profesional care and  
thorough cleansing for  
canine and feline ear.*

Otiflex **C** y Otiflex **Cleanser**

 LABYES

# Otiflex C

OTIC LINE › Antibiotic

*Innovation and proven efficacy for treating external otitis in canine and feline patients.*

## COMPONENTS AND THERAPEUTIC ACTION

### THE ONLY ONE WITH Tris-EDTA

Sensitizes microorganisms to antibiotics.

**Especially useful** in bacterial otitis resistant to other treatments, such as *Pseudomona aeruginosa*, *Proteus vulgaris*, *Escherichia coli* and *Staphilococcus*.

Tris-ethylenediaminetetraacetic acid (**Tris-EDTA**) **acts** by chelating minerals such as calcium and magnesium, affecting bacterial cell membranes and increasing their porosity thus favouring antibiotic diffusion.

Its **buffer action** modifies pH, creating an alkaline medium that improves effectiveness.

**Potentiates** the action of ciprofloxacin.

### Ciprofloxacin

Broad-spectrum fluoroquinolone that acts against isolated gram-positive and gram-negative germs in otic infections.

### Ketoconazole

Highly effective antimycotic against *Malassezia pachydermatis*, *Candida albicans*, *Trichophyton* spp and *Microsporum canis*. First choice in fungal otitis treatment.

### Prednisolone

Steroid with potent and rapid anti-inflammatory action in the outer ear.

## USAGE

**Only 1 or 2 pump** squirts in each ear are sufficient, depending on the depth of the ear canal.

Usually, treatment will take no less than **14 days applying twice daily**.

Professional cleaning is recommended when treatment with Otiflex Limpiador is started, allowing at least 30 minutes before applying Otiflex C.

PRACTICAL DISPENSER PUMP FOR EASY AND PRECISE APPLICATION

# Otiflex Cleanser

OTIC LINE › Hygiene and prevention

*Professional hygiene for the ears of dogs and cats.*

## ACTIONS

**Prevents** otitis, its recurrence and consequences.

**Cleans and dries** the epithelium of the external auditory canal.

**Inhibits** growth of harmful microorganisms such as fungi and bacteriae.

Its **slightly acidic ph** preserves ear canal medium homeostasis.

Ceruminolytic action that favours debris elimination.

**Eliminates** ear odor, especially in predisposed breeds.

**Practical dispenser pump** allows easy and precise application in one or two squirts according to the size of the ear canal, achieving thorough cleaning that avoid need of using swabs that may cause damage.

THE ONLY CLEANSER WITH AN EFFECTIVE APPLICATION SYSTEM

AVAILABLE IN 100 ml AND 25 ml BOTTLE.

# Otiflex C

> Antibiotic

Clinically proven **high efficacy**.\*

**No local toxicity**.\*

**Easy application** and correct dose due to its practical dispenser pump.

**Contains no ototoxic antibiotics** such as gentamicin.

## FORMULA

Each 100 ml of product contains:

Ciprofloxacin base	0.8 g
Ketoconazol	2.0 g
Prednisolone	0.25 g
Excipients q.s.	100 ml

# Otiflex Cleanser

> Hygiene and prevention

Gently and efficiently dissolves accumulated wax and debris, providing safe **hygiene of the ear canal** avoiding need of using swabs that may cause damage.

Its **slightly acidic ph** preserves ear canal medium homeostasis.

**Practical** dosifier container.

## FORMULA

Each 100 ml of product contains:

Dimethylsulfoxide	5.0 ml
Salicylic Acid	2.0 g
Boric Acid	2.5 g
Borax	0.4 g
Excipients q.s.	100 ml
